ev Series = Evolution Series | ¹ Used in extreme "enterprise" environments such as multiuser computer systems, server applications, and tiered storage arrays. ² Available in USB and Thunderbolt versions. | ³ When used with optional RAID controller. Available at g-technology.com.

Network-Attached Storage Solutions

We've been there for your production needs from small portable drives to large, multi-bay RAID solutions. And now we're making collaborating with your team a breeze with the G-RACK Line. The G-RACK Line integrates with popular non-linear editing suites and provides a central storage location for all your digital content.

It's what's next in centralized video storage.

Studio & Shuttle Line

The Studio Line meets the workflow needs of today's most demanding and productive creatives. Styled after the smooth, ebony contours of Apple®'s top workstations, all Studio models feature backward-compatible, 20 Gbps Thunderbolt 2 connectivity for next-generation, high-throughput content. Internally, Studio solutions rely on high-capacity, Enterprise-class hard drives that can be user-configured into a wide range of RAID options weighted toward speed or additional data protection.

Engineered to run fast, quiet, and around the clock, the Studio Line can tackle every workflow need.
